Junior Android Developer | Kotlin | Jetpack Compose | KMP

Professional Summary

Junior Android Developer with a background in QA testing and test automation, and formal training in Multiplatform Application Development. Focused on Kotlin, Jetpack Compose, and Clean Architecture, with a strong interest in modern Android development, testing, app quality, and Kotlin Multiplatform. I combine hands-on app development with a solid quality mindset, maintainability, and good engineering practices.

Technical Skills

Android & Mobile: Kotlin, Android, Jetpack Compose, Android Studio, Navigation, ViewModel, SavedStateHandle, Kotlin Multiplatform, Compose Multiplatform.

Architecture & Data: Clean Architecture, MVVM, UI state management with Flows/StateFlow, Coroutines, Room, SQLDelight, DataStore, Retrofit, Ktor, Firebase Auth, Cloud Firestore.

Testing & Quality: Unit Testing, Integration Testing, Compose UI Testing, Manual Testing, Test Automation, Selenium, Cypress, Playwright.

Tools: Git, GitHub, GitHub Actions, Docker, Jira, Trello, Teams.

Selected Projects

Shared Notes App

Kotlin, Android, Jetpack Compose, Firebase Auth, Cloud Firestore, Clean Architecture

- Developed an Android notes application with authentication and multi-user note sharing.
- Implemented access roles for owner, editor, and reader.
- Managed UI state, screen navigation, and note creation, editing, and sharing flows.
- Added unit and integration tests for ViewModels and use cases.
- Focused on maintainable architecture, separation of concerns, and testing.

Reading Tracker / Book Journal

Kotlin Multiplatform, Compose Multiplatform, Android, Web Demo, SQLDelight, DataStore

- Developing a local-first application to track books, reading sessions, progress, notes, and statistics.

- Sharing business logic between Android and a web demo for portfolio purposes.
- Designing the project with clean architecture, scalability, and user experience in mind.
- Building it as a portfolio-focused app and as a future candidate for Google Play publication.

Professional Experience

QA Tester

Capitole — Barcelona, Spain

11/2024 – 11/2025

- Worked in a professional software development environment supporting validation and quality processes.
- Collaborated with technical teams on testing, issue tracking, and functional verification.
- Built professional experience that strengthens my current focus on Android development, testing, and app quality.

QA Tester

Convotis Iberia — Elche, Spain

08/2023 – 09/2024

- Designed and executed manual and automated test cases for web applications.
- Automated tests using Selenium and Cypress.
- Reported and tracked issues, validated functionality, and supported software quality processes.
- Worked in collaborative environments using task and issue tracking tools.

Test Development Intern

Minderest — Murcia, Spain

03/2023 – 06/2023

- Performed End-to-End testing with Playwright during a 400-hour internship.
- Created Docker images for a web application.
- Gained first professional experience with test automation and real development workflows.

Education

Higher Technician in Multiplatform Application Development

IES Ingeniero de la Cierva — Murcia, Spain

2021 – 2023

Technical Baccalaureate

Colegio San Buenaventura — Murcia, Spain
2011 – 2013

Languages

Spanish: Native

English: C1

German: A1
